

SELECT STATEMENT ASSIGNMENT

ENVIRONMENT: ORACLE 11G EXPRESS EDITION | SQL DEVELOPER

QUESTION1:

SELECT DISTINCT STATE, ZIP, CITY

FROM CUSTOMER;

The screenshot shows the SQL Developer interface. The 'Connections' pane on the left displays a tree structure for the 'HR' schema, including tables like COUNTRIES, CUSTOMER, and DEPARTMENTS. The 'CUSTOMER' table is expanded, showing columns: CUSTNO, CUSTNAME, ADDRESS, INTERNAL, CONTACT, PHONE, CITY, STATE, and ZIP. The 'Worksheet' pane in the center contains the SQL query: `SELECT DISTINCT STATE, ZIP, CITY FROM CUSTOMER;`. The 'Query Result' pane at the bottom shows the results of the query, with columns STATE, ZIP, and CITY. The results are as follows:

STATE	ZIP	CITY
1 CO	80309	Boulder
2 CO	80027	Louisville
